

DOVRE Keeping Norwegians warm for generations

More specifically since 1922, when Dovre was first established. Known for our high quality underwear for men, Dovre quickly became a people's favorite in Norway.

Today we feature top of the line outdoor wear for men and women. Designed to tackle the rough climate and harsh conditions of the Norwegian winter, each piece is tailored for the best possible fit, durability and functionality. Created from the finest fibers – sourced from natural materials.

And to us, that's really what it's all about. Nature. About the memories we make in the great outdoors, and doing business in a way that allows our children to share those same adventures. For generations to come.

MEN'S UNDERWEAR **CHOOSE YOUR FIT**

Trunk with a wide and soft waistband and fly.

BOXER BRIEF

and full coverage.

Fitted brief with curved fly

MIDWAY BRIEFS

MODEL 06 Tight fitted boxer brief with fly. Covers about half of the thigh.

MODEL 51 Briefs with high waist, long legs and good support.

QUALITIES

WOOL

A natural material with thermoregulating properties. It provides good insulation, transports moisture and is odor neutralizing.

BAMBOO VISCOSE

An extremely soft fiber that absorbs 3-4 times as much moisture as cotton. It is naturally antibacterial and odor-resistant.

COTTON

A natural material that offers great breathability and feels comfortable against the skin.

POLYESTER

A synthetic fiber that is extremely durable. It is quick drying and retains colors and shape well.

ELASTANE

A synthetic fiber with elastic benefits. It offers great stretch and durability that is perfect for underwear. The material makes sure that the underwear keeps its shape all day.

POLYAMIDE

A strong, hardwearing synthetic fibre. Is often used in a blend with other fibers to improve durability and to add stretch.

DOVRE 🜑

HOW TO USE LAYERS

Using layers is key for tackling cold winter conditions. When done right, layers help keep you warm, dry and sheltered from the elements.

1: BASELAYER

The baselayer is worn closest to the body. Preferably as a thin, tight fitted shirt and thermal underwear (long johns) made from wool. The base layer insulates and transports sweat from the body, making wool and its moisture absorbing qualities perfect for the job. Wool also helps regulate your body temperature, feeling warm when you are cold, and cool when you are warm.

2: MIDLAYER

The midlayer is thicker and fits looser. For example a sweater or zip, being the layer that keeps you warm. It also catches the sweat and moisture transported out from the base layer, and helps to keep you dry.

3: OUTERLAYER

The outerlayer shields you from the elements. This is typically a shell jacket or pants repelling wind and water. Also the outerlayer should have breathing and insulating qualities, letting moisture out – but not in.

and the second sec

DOVRE

WE LOVE WOOL

At Dovre we have been working with wool for decades. Wool has amazing properties, making it the perfect material for every occasion, every challenge, and every adventure.

WHY WOOL?

Wool is one of the oldest fibers utilized by humans. It has been used for clothing for more than two thousand years, and it's easy to understand why. Wool is the most elastic fiber of all natural textile fibers, it can absorb up to 35 % moisture without feeling wet, it naturally protects against the sun's UV rays and it has insulating and thermal properties, enabling it to regulate body temperature. In addition, wool is a strong and durable fiber with natural self-cleaning properties allowing us to create products that last for a long time. Our collection features a lot of merino wool in particular. Merino wool is sourced from the merino sheep, known for having

from the merino sheep, known for having exceptionally soft wool. Merino wool has extra thin and fine fibers that feel light and soft against the skin – while still sharing all the insulating and breathing properties of other wool. Its soft and non itching quality has made merino wool high in demand for both children's wear and outdoor active wear.

Conversely, conventional production of wool has had a lot of issues, especially regarding animal welfare. Wool mowers are usually not paid by the hour, but by volume, which encourages quick work, without paying attention to animal welfare. One of the biggest problems in wool production is something called 'mulesing'. Mulesing is the process of restraining lambs, usually 6-12 weeks old, on their backs in a metal cradle and using shears, similar to garden shears, to cut away folds of skin around their backsides. At Dovre we do not allow this to be practiced, and all our wool is therefore guaranteed mulesing-free and certified organic.

WE FIGHT FOR ANIMAL WELFARE

WHAT IS ORGANIC WOOL?

When the wool is certified organic, it helps to ensure that the sheep have been treated well. An organic certification ensures, among other things, larger stables with more space per sheep. In addition, sheep are allowed to keep horns and tails - which is not always the case in conventional wool production. At the same time, the sheep are sheared individually, which is less stressful for the animal. In the Dovre Outdoor concept, we mostly use organic wool. Finally, it is important to point out that mulesing must not take place in the production of organic wool. When the wool is certified organic, we can ensure that the sheep are treated according to the 'five freedoms' of animal welfare:

- 1: Freedom from hunger, malnutrition and thirst.
- 2: Freedom from fear and distress.
- 3: Freedom from physical and thermal discomfort.
- 4: Freedom from pain, injury and disease.
- 5: Freedom to express normal patterns of behavior.

A PART OF JBS TEXTILE GROUP

Since 1939, JBS Textile Group has been a specialist in high quality men's underwear. We believe that comfort and the perfect fit are achieved through expertise, experience and constant attention to detail. That's the approach we take with every product we make. And it reflects our passion, values and standards.

JBS is the largest supplier of underwear in Scandinavia. But, over the years, we have branched our expertise into other areas of the textile industry. Today, 18 brands are part of the JBS Family - each with its own unique identity and audience.

Each day, more than 100,000 products are sent from our warehouse in Denmark – to retailers and stores in more than 50 countries. We are always exploring new materials and functions – but never lose sight of our principles and values. That's the approach of a true specialist.

THIS CATALOG IS A CRADLE TO CRADLE CERTIFIED PRODUCT

This catalog is a Cradle to Cradle certified product. This means you are holding a guaranteed sustainably printed product that is 100% biodegradable and completely free of harmful chemicals and heavy metals.

This also means that KLS Pureprint has produced this catalog by recycling the earth's resources in a natural circular process without any harmful waste that is toxic to humans and the environment.

Cradle to Cradle is the world's most stringent environmental certification, and guarantees that a product does not pollute or use the limited resources of the earth, but instead is integrated in nature's own cycle. It also ensures that the printed products are produced under conditions that are as environmentally friendly as possible.

When disposing of the catalog, the paper should be handed over as paper for recycling and the metal spiral as metal for recycling.
